

# Get Started on Your Cloud Innovation Journey

## About Get Started Program

With several platforms entering the public cloud space, companies need to consider a lot of factors before deciding on the best provider for them. From our perspective, AWS Cloud is the best choice for businesses starting their cloud journey as AWS is the nimblest cloud platform, which is really what companies need to scale fast and meet the market's changing demands by adding new features and services quickly.

Get Started is a program offered by FORTE CLOUD to help companies harness the power of AWS, eliminating the complexities that they face so they can focus on innovating and developing their offering.

The Get Started program was developed by experts for businesses with the aim of extending AWS support and offerings.

## Benefits

### » Consulting & Design

**5 days** to be consumed in design, configuration & infrastructure optimization, executed by a Solution Architecture from our technical team

### » Setup & Deployment

Our technical team will help you create your AWS account, setup your environment and landing zone, and finalize your infrastructure onboarding

### » Infrastructure Support

Once you are live, we will provide you with **10 support tickets** to be consumed over the **first 5 weeks** of your live operations.

## Diverse END-TO-END Solutions

To innovate and respond quickly to changing demands, organizations are migrating and modernizing their infrastructure and
